

ModularNode MK3

Description

This waterproof node has a built-in 4000mAh LiPo battery, which can optionally be charged via an integrated or external solar module. The modular design makes it easy to add different sensors using waterproof connectors. Up to 3 external sensors can be connected directly. If more sensors are required, the sensor connections can be expanded using a distribution cable.

Furthermore, the node can be internally supplied with new interfaces by 2 plug-in modules. An external antenna can be connected for areas with poor radio coverage.

Configuration is done with our WASN Configurator software for Microsoft Windows.

Specifications

- Timer and interrupt triggered measurement
- Integrated 4000mAh LiPo battery
- Solar charge option
- IP67 rated casing
- Complete modular design

Technical details

- based on an ASR650x MCU
- DeepSleep current of 16uA
- 3 external sensor interfaces with IIC and OneWire
- 2 internal plugin ports for various expansions:
 - Serial interface
 - RS485
 - Digital I/O
 - Analog inputs
 - ATECC608 crypto chip
 - ...

Supported Sensors:

- | | |
|--------------------------|----------------------------|
| • Temperature, Humidity | • Wind speed and direction |
| • Air pressure | • Vibration |
| • Soil moisture | • Magnetic field |
| • Leaf wetness | • Different gases like CO2 |
| • UV and light intensity | • ... |
